

Definitions of CIRM-Developed and CIRM-Hosted Materials

CIRM-Developed Materials

Model curriculum on stem cell science in the Education Portal.

CIRM-Hosted Materials

Are submitted using the processes described in the Submit Resources section. CIRM reviews the materials for use by teachers to supplement their science curricula. CIRM hosting, in this context, means the material demonstrates an acceptable level of source credibility, scientific basis or method, and appropriateness for a high school student audience. This is not a forum for individuals or organizations to express their positions or opinions, nor will any materials that appear to be biased, either for or against stem cell research, be posted to the Education Portal. You'll find all submitted and additional teaching materials at Other Teaching Resources in the Education Portal.
